Comments Report

1. Instructor/Course Evaluation:

^{1.15)} What do you consider to be the strengths of this course?

- The hands on activity really brings concepts in class to life. This is especially true for Physical Principles students because most the math is trivial in comparison to the mental visualization to accompany it.

^{1.16)} What constructive suggestions do you have for improving this course?

- Dr. Davis is knowledgeable and very nice, he should go around and check on students more!
- I think the instructor needs to be aware that not all of the students in this class are in the Calculus based class when he goes over the pre-lab. I also think that the professor needs to go over the pre-lab over better because sometimes the classes have not covered the material effectively.

^{1.17)} Other comments?

- None, Dr. Davis may have been a first year professor but was my best lab instructor this year.
