Comments Report

1. Instructor/Course Evaluation:

1.15) What do you consider to be the strengths of this course?

- Dr. Davis and his assistant were very helpful when called on during the lab.
- The biggest strength of this course would be how well the experiments exemplified the methods being taught in lecture. The labs went along with the lecture extremely well, and the quizzes in the lab had just the right level of relevance and depth.
- The instructor was very helpful.
- The lab helped me understand the material better.

1.16) What constructive suggestions do you have for improving this course?

- Dr. Davis uses quizzes held after the lab to grade us. However, the quizzes are theoretical and often not directly relevant to the lab that was held. Because of this, I found it was better for my grade to skip as much of the lab assignment as possible and instead focus on learning equations and other content relevant to the topic. Either the lab should be geared toward the quiz or the quiz should be geared toward the lab. Both aspects are educational.
- It is set up really good, I have no constructive suggestions.
- My only suggestion would be to return the graded quizzes to the students in a timely fashion. We did not receive any of our graded work until the second to last class time.

1.17) Other comments?

- Good instructor!
- None.
